

**All measurements in mm**

**Panel = 128.5 x 30mm (6HP)**

**Standard doepfer holes / slots**

**NB: check that 7.1mm  
holes will work for your pots**

**NNB: Send & Return phono sockets  
for spring MUST be isolated  
if panel material conducts  
electricity (my PCB design takes  
this into account) No part of the 'send'  
socket can be in contact with GND.  
Isolated jacks may be larger than  
6.5mm, which is a basic chassis  
mount phono socket.**
